Lack of trust – “*the good, the bad, and the ugly*”

Session 14:00-16:00 PM CEST

DAY 1

Technology and Interoperability

Tuesday, 23 June 2020

Lack of trust – “the good, the bad, and the ugly”

The legal: Anonymisation – can it ever satisfy?

- Pseudonymisation, the new counterfeit . . .
- The single individual data row, no room even for an anonymised id . . .
- For epidemiology, it sort of misses the point

The practical: Data processing – show me your reasons!

- Data-misinterpretation risk
 - Bona fide interpreters – “for your eyes only”
 - What about the data subjects themselves?
